

Guiding research from uncertainty to credibility

The Scientific Integrity and Publication Oversight Program (SIPOP) helps researchers improve the methodological rigor, statistical validity, and publication trustworthiness of their biomedical research.

About SIPOP

The Scientific Integrity and Publication Oversight Program ensures rigorous, transparent, and ethical research practices in biomedical sciences. Our mission is to elevate research standards by providing thorough review and guidance, minimizing bias, and fostering credibility in scientific publications.

How It Works

Submission

Researchers submit their studies and findings for initial assessment.

Review

In-depth review of methodology, statistics, and ethical transparency.

Guidance

Detailed feedback and recommendations for improving research quality.

Validation

Final assessment to ensure rigor adherence to scientific standards.

Service Models

Find the right level of support for your research

MOST POPULAR

Technical Review

PRE-SUBMISSION AUDIT

- ✓ Independent methodological assessment
- ✓ Language and scientific writing review
- ✓ Formatting and editorial standards check
- ✓ Competitive positioning analysis
- ✓ Detailed report with actionable recommendations
- ✓ Delivered within 7 business days

[Request a Review](#)

Standard Mentorship

THE FOUNDATION

- ✓ General methodological guidance
- ✓ Periodic strategic meetings
- ✓ PICO framework definition
- ✓ Search strategy orientation
- ✓ Results screening support

Advanced Mentorship

FULL SUPPORT

- ✓ Active project participation
- ✓ Complete search strategy execution
- ✓ Data extraction sheet design
- ✓ Full statistical interpretation
- ✓ Scientific writing support

Benefits of Working with SIPOP

Validated Research

Confidence that research results were achieved through scientific standards.

Methodical Guidance

Expert advice on study design, statistical analysis, and publication ethics.

International Standards

Compliance with international guidelines, enhancing credibility.

What Researchers Are Saying

"Before SIPOP, my biggest challenge was finding someone who truly understood network meta-analysis. I couldn't find anyone to answer my questions — or a statistician willing to commit to my study. SIPOP gave me peace of mind. And for someone in the final stretch of a PhD, that's worth everything."

Suzana Bleckmann Reis

PhD Candidate in Rehabilitation Sciences
Faculdade de Medicina — Universidade de São Paulo

"I had a complex research question and a tight deadline. SIPOP delivered with agility and competence — and the article was published."

Ivan Daniel Bezerra Nogueira

Associate Professor of Physical Education
Universidade Federal do Rio Grande do Norte — UFRN

"The meta-analysis finally unlocked my research. I went from an insecure researcher dealing with scattered data to an author with a structured article, grounded in high-level evidence."

Kátia Marques Lombardo

Senior Researcher
Centro de Educação Física e Desportos — CEFID

ETHICAL DISCLAIMER

SIPOP is a scientific governance and oversight program. We do not provide ghostwriting services, data fabrication, or guaranteed publication. Our role is to audit methodology, enhance statistical integrity, and ensure compliance with international reporting standards (PRISMA, CONSORT, GRADE). All final intellectual and ethical responsibilities remain with the authors.
