

PRE-SUBMISSION AUDIT

What would a reviewer find in your article in 10 minutes?

Most manuscripts aren't rejected for lack of scientific quality. They're rejected because the work wasn't prepared for the scrutiny of the evaluator.

[Request a Technical Review](#)

WITHOUT SIPOP

- ✗ Desk rejection
- ✗ Months of correction cycles
- ✗ Opportunities that don't come back
- ✗ Years of work buried by avoidable flaws

WITH SIPOP

- ✓ Expert evaluation before the editor sees it
- ✓ Detailed report in 7 business days
- ✓ Actionable recommendations, not just notes
- ✓ Confidence to submit — and publish

Every detail evaluated

Being technically correct is the baseline. High-impact journals look for something harder to fake: **Strategic Coherence** — the alignment between your question, your design, and your analysis, from the very first paragraph.

**Methodology**

Analysis validity, bias identification, instrument alignment, and sampling adequacy.

**Language**

Scientific writing quality, active voice preference, vocabulary precision, and dialect adequacy for your target journal.

**Formatting**

Paragraph structure, section length, and editorial compliance with international reporting standards.

**Competitive Positioning**

Innovation assessment, literature saturation, and relevance for the journal you're targeting.

**Content Coherence**

Capacity to answer its own research question, data grounding, and literature alignment.

**International Standards**

Compliance with PRISMA, CONSORT, STROBE, GRADE, and other applicable guidelines.

What researchers say

"Before SIPOP, my biggest challenge was finding someone who truly understood network meta-analysis. SIPOP gave me peace of mind. And for someone in the final stretch of a PhD, that's worth everything."

**Suzana Bleckmann Reis**

PhD Candidate in Rehabilitation Sciences
Faculdade de Medicina — Universidade de São Paulo

"The meta-analysis finally unlocked my research. I went from an insecure researcher dealing with scattered data to an author with a structured article, grounded in high-level evidence."

**Kátia Marques Lombardo**

Senior Researcher
Centro de Educação Física e Desportos — CEFID

Request your Technical Review

Tell us about your research. We'll get back to you within 1 business day to discuss your manuscript and next steps.

- ✓ Independent expert evaluation
- ✓ Detailed report with actionable recommendations
- ✓ Delivered within 7 business days
- ✓ Covers methodology, language, formatting, and positioning

ETHICAL DISCLAIMER

SIPOP is a scientific governance and oversight program. We do not provide ghostwriting services, data fabrication, or guaranteed publication. Our role is to audit methodology, enhance statistical integrity, and ensure compliance with international reporting standards (PRISMA, CONSORT, GRADE). All final intellectual and ethical responsibilities remain with the authors.
